

SPOTLIGHTING OUR PEOPLE

INTERIOR DESIGN TEAM

With Americans spending an average of 90% of their days indoors, a well-designed building interior is essential to providing for the health and wellness of those who work in and visit our buildings. American Structurepoint's Architecture + Interiors Group designs transformative, sustainable spaces for clients across the globe. Offering a full range of services, our team partners with clients in several markets, including education, federal, commercial, hospitality, industrial, healthcare, and municipal.

At American Structurepoint, we don't grow for the sake of growing – we grow to be better. To facilitate and design more impactful spaces, we recently hired Luke Kinne, an experienced interior designer who has worked on key projects across the country, to enhance and grow our interior design practice.

With almost 20 years of interior design experience, including work on approximately 4 million square feet of corporate office and hospitality space, Luke excels at creating engaging environments that support clients' wellbeing. Some of Luke's current projects include the

Avon Community Government Center, multi-family units for Flaherty and Collins, and the Hudsonville Ice Cream office expansion and renovation. American Structurepoint recently won the 2023 Indiana International Interior Design Association IDEA Award for the Noble County Annex Building.

American Structurepoint is dedicated to design excellence from largest community layout considerations down to the most intricate interior building detail, and we have the in-house expertise to deliver all scales of solutions. Thoughtful interior design is also shown to aid in employee attraction, retention, and satisfaction, which is more important now than ever.

With a wide range of projects, ample growth opportunity, and a commitment to professional development, our Architecture + Interiors team is a great place to start and grow your career.
