We define the standard of excellence for people and communities who want help building and bettering their communities.

With design centers in Cleveland, Columbus, and Cincinnati, our Ohio professionals are known for their excellent customer service to local Ohio communities and for their experience designing complex interstate projects for the Ohio Department of Transportation. Our local capabilities are enhanced by our firm's staff of approximately 600 engineers, designers, construction inspectors, and other specialists who can help meet any production need. We do what it takes to successfully complete any project, and we have the flexibility to react to rapidly changing production requirements.
