

# SPOTLIGHTING OUR PEOPLE

## WOMEN IN CONSTRUCTION

We celebrate all women at American Structurepoint, and this week we especially want to recognize the women in our Construction Solutions Group as a part of Women in Construction Week.

Our construction inspectors deliver results for many of our client's most important projects, and we deliver those results because of these talented women.

Our dedicated team oversees schedules, manages relationships with clients, and provides fiscal oversight of

various transformational projects. Whether it is the Chicago Street reconstruction, which widens and improves road safety in Hammond, or Interstate 69 Section 6, which connects Indianapolis and Evansville, this is more than a job to them. Our team is driven to make a difference every day and change lives.

Please join us in celebrating American Structurepoint's Women in Construction and their dedication to improving the quality of life for the people and communities we serve.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
