

PROJECT

SPOTLIGHT

Improving quality of life can take form in many ways, whether it's a safer bridge, a more efficient road, or a research facility providing critical breakthroughs. American Structurepoint's team of dedicated professionals is committed to improving communities across the country.

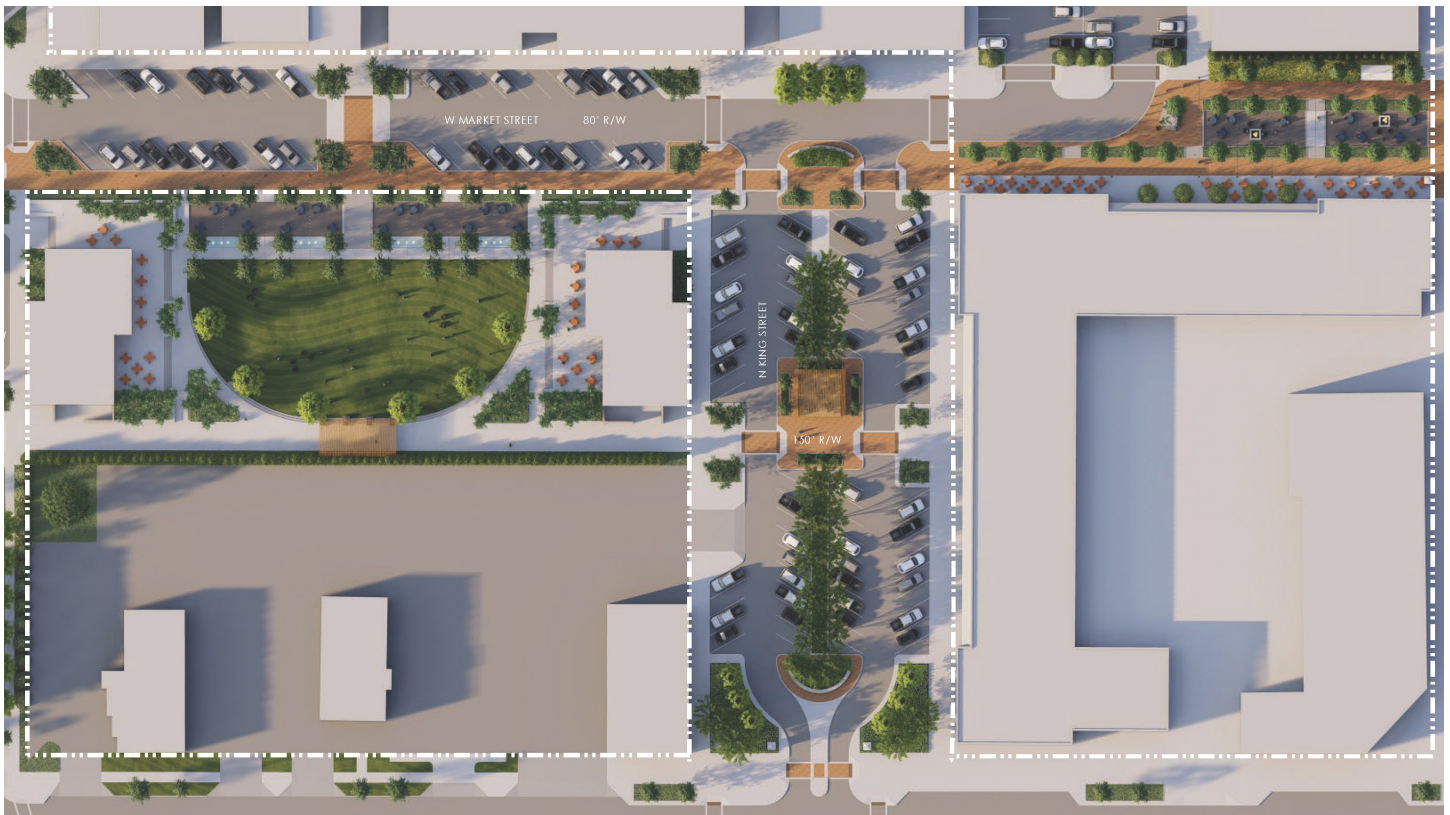

One example of this is our public-private partnership with leadership in the City of Xenia, Ohio, and Dillin Corporation. In 1974, the city was devastated by an F5 tornado, and a shopping center was built in its downtown. Xenia officials are now wanting to rebuild the area with a mixed-use development to improve the look and feel of downtown Xenia and develop a place where residents can walk, dine, and shop.

With many revitalization projects in our background, American Structurepoint is specifically helping with the

planning, streetscape elements, utility upgrades, road improvements, and priming the area for development. Our team of more than 600 in-house experts working across 11 disciplines turns our client's vision into reality.

By taking time to understand a project's needs, our innovative team is able to anticipate barriers to success and overcome them. American Structurepoint's team guides our clients to a successful outcome on projects of all sizes and scope.

We are grateful for the opportunity to partner with the City of Xenia and Dillin Corporation on this community-defining opportunity and look forward to creating a vibrant area for people to walk, dine, live, and shop.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
